**ACTION TAKEN REPORT ON TEACHERS FEEDBACK**

**ACADEMIC YEAR 2019-20**

The IQAC of NMSM Government College Kalpetta received valuable feedback from faculty members during the academic year 2019-20. This feedback was integral to identifying key areas of improvement within the college's academic and administrative framework. In response, the institution implemented a series of strategic actions to foster academic excellence. The curriculum was significantly enhanced through the adoption of Outcome-Based Education (OBE) across both undergraduate and postgraduate programs. Teachers were instrumental in expanding academic offerings, with the introduction of MA History and BSc Chemistry in 2020.

The institution also emphasized professional development by organizing faculty workshops and seminars. This led to the successful implementation of a Mentor-Mentee System, which allowed teachers to provide personalized guidance to students, improving retention and progression. The faculty's role in promoting research was recognized and encouraged, with a strong emphasis on publishing academic work in reputed national and international journals.

Infrastructure development played a critical role in supporting the academic goals of faculty members. ICT-enabled classrooms were upgraded, and new laboratories for the BSc Chemistry program were established. The library also saw enhancements to better support the MA History program. The college's focus on sustainability extended to faculty involvement, with solar power panels installed across campus as part of a broader environmental initiative. E-governance systems were also introduced to streamline administrative tasks, including admissions, attendance, assessments, financial transactions, and examination procedures.
